[4-6 Month MCAT Study Schedule, 15-20 hours/week \(Practice-Focused\)](#)

Introduction

There are countless theories on how to study for the MCAT. Some experts recommend devoting 300 hours, others say 250 or 400. Some say you should focus on one or two subjects at a time, and others say you should visit all the subjects each week. The one thing that most everyone agrees on is that spacing your study time across several weeks or months is best. For instance, it is better to study 20 hours a week for 4 months, rather than 40 hours per week for 2 months. If you are beginning your studies with six or more months between now and your test date, you're among the fortunate and forward-thinking few!

With the schedule outlined below, you will focus on drilling practice questions and taking practice tests for 4-6 months, at a rate of 15-20 hours per week. And here's something cool: If you study 20 hours a week and tack on an extra 8 hours at some point, your total study time will be 528 hours! As in, a perfect score, get it?

That is a lot of studying. But if you're reading this 6 months before the exam, you are in a great position to log an impressive number of hours and attain an amazing score. *If you have fewer than 6 months, you can increase your daily study time or decide on a pace that will help you achieve at least 300 hours of study time total.*

Are you ready to start crafting your schedule? I hope you're excited to get started, but definitely take the time to read over the list of materials! Don't skip the important step of setting up a notebook for tracking your study time, study environment, and insights about your own productivity. Nobody knows exactly who is responsible for the quote, "What gets measured, gets done," but hundreds of behavioral modification studies show that the saying is true. If you want to be super productive, track and monitor everything!

The Magoosh Team

We're a team of passionate educators in Berkeley, California. We like word games, video games, and helping students do really well on standardized exams so that they can achieve their educational dreams! :) You can learn more about us and what we do on our [Team page](#). If you have any questions, feel free to contact us at help@magoosh.com!

Meet the Magoosh MCAT Expert

Kat Thomson has a PhD from UC San Francisco with degrees in medical sociology and health psychology. Since 2005, she has been teaching premed and nursing students across the US. Kat collaborates with other experts to create quality MCAT products, and above all, she enjoys mentoring students. While Kat does love cats, she happens to be allergic to them, adding a new dimension to the concept of autoimmunity. Follow Kat on Instagram at [@MagooshMCAT](#) to get her top MCAT tips and advice!

Magoosh's MCAT Product

Magoosh is an [online MCAT prep course](#) that offers:

- 250+ unique lessons on all MCAT subjects
- 700+ practice questions, with video explanations after every question
- Customizable practice sessions
- Full-length timed practice tests
- Personalized statistics based on your performance
- Material created by MCAT experts

- 24-hour access to online materials from any internet-connected device
- Email support from experienced MCAT tutors
