- [GMAT Score Charts \(Verbal Score: 39-51\)](#)

About Us

The Magoosh Team

We're a team of passionate educators in Berkeley, California. We like word games, video games, and helping students do really well on standardized exams so that they can achieve their educational dreams! :) You can learn more about us and what we do on our team page. If you have any questions, feel free to contact us at help@magoosh.com!

Magoosh's GMAT Product

Magoosh is an online [GMAT prep tool](#) that offers:

- Over 300 Math and Verbal videos, that's over 20 hours of video!
- Over 1,300 Math and Verbal practice questions, with video explanations after every question
- Material created by expert tutors who have in-depth knowledge of the GMAT
- E-mail support from our expert tutors within 24 hours
- Customizable practice sessions and mock tests
- Personalized statistics based on performance
- Access anytime, anywhere from an internet-connected device

How do I read the GMAT score chart?

Use this chart to find out how your section scores create your overall score. This way, you can see what score you need in each section to calculate your dream score.

For example, different combinations of Verbal and Quant scores can be mixed to get you an overall score of 700—see what section you’re strongest in and aim to boost your score as much as possible in this area to get the overall score you want.

With that said, Verbal section scores do “count” for slightly more of the overall score (GMAT test-takers tend to be stronger in Quant), so work on boosting your score in this area to get the strongest possible overall score!

What are the percentiles along the rows and columns?

Since high Verbal scores “count” for slightly more than a high Quant score, a Verbal subscore of 40 would be in the 90th percentile, definitely in the top 10%. By contrast, a Quantitative section subscore of 40 would be only the 39th percentile, not even in the top 50%!

The two subscores are definitely not equivalent in terms of percentile scores. But does this mean you should forego problem solving and data sufficiency practice in favor of more reading comp? No! All it means is that the percentile ranking for these sections differs.

This in part reflects a vast asymmetry in the GMAT test-taking pool: many more GMAT takers in an international market excel in math and struggle in verbal, so commanding performances in math are reasonably common, whereas commanding performances in verbal are less frequent.

To see how your GMAT total score translates to your percentile, check out our article on [calculating GMAT percentiles](#). Now, let’s get into the GMAT Score Charts!

GMAT Score Charts

Color Coding

- **Yellow highlight** = Good GMAT Score (learn more in our [GMAT Scores post](#))
- **Green highlight** = Great GMAT Score (especially for top b-schools in the U.S.)
